

I would like to give a big thank you to the IRTA. It was an honor to be chosen for the 2019 classroom grant. I used the money to help buy needed tools for our small engines/automotive class. This was our very first year for the class and it was very expensive to start due to tool and equipment cost. The IRTA grant helped alleviate some of the cost. Not only are you helping the students, you are helping the community with this grant. The automotive industry is in dire need to find the next generation of technicians. The class will help encourage the students to go into the skilled trade market. On behalf of my students, the community, and myself, thanks again for what you did for our class.

Sincerely,

*Ryan Repking*
