

Thank you very much for choosing my class to receive the IRTA grant. I used the money to buy an automotive diagnostic scanner, inspection borescope, and a coolant funnel kit. The students were very excited to use the tools in class. Automotive tools are very expensive and the grant money helps greatly. Without your help the students would not have the opportunity to use these types of tools. Again, thank you so much for everything you do for schools!

Sincerely,

Ryan Repking
